

MOHAMMUD BASSAM SALIM

Cybersecurity Analyst | Application Security & SOC Operations

Albany, NY 12203 | +1 (838) 200-7109 | bassam.salim56@gmail.com | linkedin.com/in/bassam-salim | bassamsalim99.github.io

PROFESSIONAL SUMMARY

Cybersecurity Analyst with 2+ years of experience in application security, vulnerability management, and secure infrastructure support, plus a Master's degree in Digital Forensics and Cybersecurity. Skilled in SIEM monitoring, network traffic analysis, vulnerability assessment, and penetration testing tools including Nmap, Wireshark, Metasploit, and Burp Suite. Experienced with AWS cloud security controls, IAM, and compliance frameworks including NIST CSF and ISO 27001. Certified in Ethical Hacking (CEH v12), Cybersecurity (ISC2 CC), and Networking (CCNA).

TECHNICAL SKILLS

Application Security & Vulnerability Management: OWASP Top 10, Static Application Security Testing with SonarQube, Secure Code Review, Vulnerability Assessment & Remediation, Risk Remediation, Application Authentication Design

DevSecOps & Engineering Tooling: CI/CD Security, Ansible, GitHub, Jira, IntelliJ IDEA, Infrastructure as Code (IaC), Patch Management

SOC & Threat Detection: SIEM (Splunk), Intrusion Detection & Prevention Systems (IDS/IPS), Firewalls, Wireshark packet analysis, MITRE ATT&CK Framework

Security Testing & Penetration Testing: Kali Linux, Nmap, Metasploit, Burp Suite, Maltego, Shodan, OSINT, Social Engineering Awareness

Cloud & Infrastructure Security: AWS Security, AWS IAM, CloudTrail, CloudWatch

Digital Forensics: FTK (Forensic Toolkit), Autopsy, Magnet AXIOM, EnCase, Computer/Mobile/Network Forensics, Incident Response, Evidence Acquisition & Analysis, Malware Analysis, Data Recovery, Hard Disk Examination

Networking: Cisco CLI, Cisco Packet Tracer, Routing & Switching, IP Addressing, OSI/TCP-IP Models, Wireless Network Protocols

Governance, Risk & Compliance: NIST Cybersecurity Framework, ISO 27001, GDPR, HIPAA, SOX, PCI DSS

Scripting, Automation & Programming: Python, Bash, SQL, YAML, Java, C

PROFESSIONAL EXPERIENCE

University at Albany (SUNY), Dept of Information Security and Digital Forensics

Nov 2025 - Aug 2026

Research Volunteer

Albany, NY, US

- Contributed to an unpublished research paper, "Use of Simulation-Based Training in Cybersecurity," examining the effectiveness of gamified and simulation-based platforms for cybersecurity skills development.
- Tested and evaluated hands-on training platforms and cyber range environments, including HackThisSite, TryHackMe, and Hack The Box, to assess their instructional value for different skill levels.

Sopra Banking Software

Jan 2022 - Aug 2024

Associate Security Engineer, Application Security

Noida, India

- Investigated and remediated 100+ application-level vulnerabilities, including SQL injection, broken authentication, and insecure session handling, in 20+ Java-based banking APIs handling sensitive financial data.
- Reviewed source code and application configurations against the OWASP Top 10 and internal secure coding standards, and coordinated fixes with QA and development teams before production release.
- Documented vulnerability findings and remediation status for development teams in the US, France, Spain, and Brazil, supporting consistent application security practices across a multi-country engineering organization.
- Automated recurring deployment, patching, and environment provisioning tasks for development and test VMs using Ansible and shell scripting.
- Partnered with the Information Security team to map application controls to ISO 27001 and internal compliance requirements, and delivered cybersecurity awareness training sessions for engineering staff.

Crowe LLP

Aug 2021 - Dec 2021

Data Consultant Intern

Noida, India

- Extracted, transformed, and loaded client datasets in Microsoft Dynamics 365 to support internal reporting workflows, and built Power BI dashboards summarizing data trends for the consulting team.

PROJECTS

Network Security Toolkit (Python, Kali Linux)

Built a network monitoring toolkit that logs inbound and outbound traffic and flags unauthorized VPN usage. Functions as a lightweight intrusion detection system, identifying TCP SYN flood (DoS) attacks and ARP poisoning attempts.

Steganography Tool (C, Python)

Developed an application that encrypts text using AES and embeds it within image files, with a matching decryption feature to extract hidden messages for secure, discreet data transfer.

Dimensionality Reduction Pipeline for SOC Data (Python)

Built a machine learning pipeline combining autoencoders and a multi-layer perceptron (MLP) classifier to reduce the dimensionality of Security Operations Center (SOC) data, cutting model training time from hours to minutes while maintaining classifier accuracy.

EDUCATION

MS, Digital Forensics and Cybersecurity

University at Albany (SUNY)

GPA: 4.0/4.0

Aug 2024 - Aug 2025

Albany, NY

Bachelor of Technology, Information Technology

Greater Noida Institute of Technology (AKTU)

GPA: 8.26/10.0

Aug 2018 - Jun 2022

Greater Noida, India

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC) - May 2024
- EC-Council Certified Ethical Hacker (CEH v12) - Jul 2023
- Cisco Certified Network Associate (CCNA) - Feb 2023
- CSI Linux Certified Dark Web Investigator (CDWI) - Sep 2022

PUBLICATIONS

Co-Author, "Detection of VPNs Using Machine Learning," International Journal of Engineering Applied Sciences and Technology (IJEAST), Vol. 6, Issue 12, 2022.
